

**Community Partner:** Camp Seminole

**Action Team:** Mean Green Camp Cleaning Machine (MGCCM)

**Action Team Members:** Michael Hambrick, Josh Maples, Bill McLean, Tamica Perkins, Zach Schmidt, Shemika Weaver

During the 2008 Day One semester, the Mean Green Camp Cleaning Machine (MGCCM) completed 244 hours, logged 79 visits, and traveled 1092 miles. The purpose of their work was to emphasize the importance of recycling within Camp Seminole and to lead by example. The MGCCM built bold colored recycling bins in designated areas around Camp Seminole and assisted with the activities for the campers. They developed a recycling program that encouraged campers and guest to conserve the environment. This included starting an extensive recycling campaign throughout Camp Seminole while raising awareness of the importance of recycling. Also, the MGCCM kept the campsite clean and attractive for camp visitors. The members of this team say this about their project, "This experience is something that we will keep with us for the rest of our lives because we know that we helped the community and made new friends."
